CALL NOW

Everyday I hear stories about people who either lost their lives or took someone's life, because they were angry and expressed themselves violently. I believe that it is time to change our attitudes on anger and violence.

Do you know a young man with anger issues? Send him to my class before he gets into trouble. It is a shame that some young folks can't get support until they get in the juvenile justice system. This is chance to get anger management training without going to jail. My curriculum is designed to meet the needs of urban youth and it is relevant to their culture.

I offer an 8 week Urban Approach to Anger Management class, for 10-17 year old African American and Latino males through my company Oba Dogon SSS. Call
